

Committed to Quality— CNC Precision Delivered

Are delivery delays, inconsistent quality or rising costs from your current CNC supplier slowing your business down? There's a better way.

Barth Industries specializes in tight-tolerance, precision CNC-machined components and assemblies for OEMs and suppliers. With a 120,000 sq. ft. facility and available capacity for high-volume programs, we combine process engineering expertise with rigorous quality systems to deliver efficient, cost-conscious and scalable manufacturing. From advanced fixturing and CMM validation to equipment redundancy and rapid changeover capabilities, Barth is known for our speed, efficiency and production flexibility. We thrive in a people-first culture that values and equips our team to serve our customers with consistency, quality and trust.

Precision & Reliability

High-tolerance, precision CNC machining across multiple materials including cast iron, ductile iron, steel, carbon steel, stainless steel and aluminum with 100% inspection and CMM validation. Our rigorous quality systems and advanced fixturing specialize in achieving and verifying tight positional accuracy for consistent and reliable precision parts.

On-Time, Every Time

Just-in-time (JIT) programs and supply chain management are designed to fit your schedule. Equipment redundancy ensures uninterrupted production, while rapid changeover capabilities and continuous spindle operation feed into our JIT philosophy and promise.

Responsive Partnership

Customer first means communications focused and ample support. We respond rapidly to schedule and volume changes. Our team practices a people-first culture that makes us equipped to serve you with consistency, quality and trust.

Proven Value

Competitive pricing backed by quality performance. Our process engineering expertise ensures efficient, cost-conscious manufacturing with continuous improvement and engineering excellence to reduce costs and improve performance.

Common Challenges That are Uncommonly Frustrating

Frustrations mount and scheduling has become a nightmare. We consistently hear the same story from new customers about the challenges they have been facing:

Delivery Delays or Inconsistent Supply

- ▶ Late shipments disrupting your production schedules?
- ▶ Poor inventory management or lack of flexibility?

Poor Part Quality

- ▶ Out-of-tolerance or inconsistent parts?
- ▶ Suppliers whose quality systems can't meet your standards?

Lack of Responsiveness

- ▶ Slow replies or inability to adapt to urgent needs?

Escalating Costs

- ▶ Are issues increasing your total cost of ownership?
- ▶ No visible effort to reduce costs or improve performance?

Why Customers Consistently Choose Barth

Unique challenges require custom solutions. Our team's extensive knowledge of precision manufacturing allows us to develop plans of action customized to you. Through a combination of innovative engineering and outstanding technical service, we help our customers increase production, reduce costs and improve quality.

120,000 sq. ft. facility with available capacity to support high-volume components and assembly programs.

Tight-tolerance, precision CNC machined components and assemblies for OEMs and Tier suppliers.

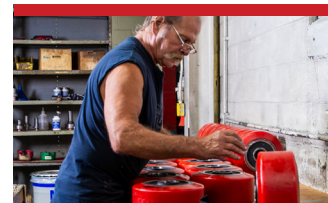

Process engineering expertise to ensure efficient, cost-conscious, scalable manufacturing.

Rigorous quality systems with advanced fixturing and CMM validation.

Equipment redundancy, rapid changeover capabilities and continuous spindle operation.

People-first culture that values and equips our team to serve customers with consistency, quality and trust.
