

Why Choose Barth Industries?

120,000 sq ft facility with available capacity to support high volume components and assembly programs.

We specialize in tight-tolerance, precision CNC Machined components and assemblies for OEMs and Tier supplier.

We have process engineering expertise to ensure efficient, cost-conscious, scalable manufacturing.

With rigorous quality systems, advanced fixturing and CMM validation we specialize in achieving and verifying tight positional accuracy for consistent and reliable precision parts.

We have equipment redundancy, rapid changeover capabilities and continuous spindle operation to ensure speed, efficiency and production flexibility.

We thrive in a people-first culture that values and equips our team to serve our customers with consistency, quality, and trust.

Barth Industries | Precision. Reliability. Partnership.
